

## TECHNICAL DATA SHEET

### SVVD041

---

#### Description

This is a versatile pure acrylic emulsion, ideal for various applications, including high-performance exterior paints. With moderate flexibility and strong resistance to water and UV light, it provides a durable and reliable option for coating needs.

---

#### Properties

- **Appearance:** White Liquid Latex
- **Solids:** ~46%  $\pm$ 1%
- **pH:** 8 – 9.5
- **SG:** 1.06
- **MFFT:** 16-19°C

---

#### Uses

This acrylic emulsion excels as a binder for a wide range of emulsion paints and textured coatings. It is particularly effective in plaster-bound systems, offering high durability and excellent performance under outdoor conditions. Paint created with this binder will have impressive UV resistance and long-lasting durability, making it a good choice for exterior applications.

---

#### Storage

All emulsion polymers need to be stored under cover and avoid frost, rain and direct sunlight.

---

#### Packaging

It can be packed in 25L, 200kg, 1000kg and tanker of 20T. Please note that there is a drum deposit and flowbin deposit and this is charged separately as well as the 25L jerry can.
